

PRESS RELEASE

HCL AXON Solution for the Oilfield Services Sector Is Now a Qualified SAP® Business All-in-One Partner Solution in the U.K.

ORLANDO, FLA – May 11, 2009 – HCL AXON, the world’s largest services provider dedicated to SAP® solutions, today announced its Rapid Deployment Toolkit (RDT) for the oilfield services sector is now a qualified SAP Business All-in-One partner solution in the U.K. The solution has already been qualified in the U.S. The RDT provides a pre-configured solution for oilfield services companies with the affordability, expertise and leverage of the SAP ERP application.

SAP Business All-in-One partner solutions are qualified by SAP and developed, sold and supported by SAP channel partners as a defined-scope implementation with consulting services, and offer the flexibility to accommodate the unique business needs of each customer. Qualified SAP Business All-in-One partner solutions are preconfigured, industry-specific versions of the SAP ERP application, enabling streamlined operations, lower costs and a proven path to growth.

RDT consists of a number of elements, as follows, to accelerate design and implementation:

- Pre-configured solution that accelerates design and build phases and enables “design by demo” approach
- Comprehensive documentation, target operating model, processes and training materials
- Enhancements to support oilfield services companies, such as off-line working for off-shore personnel in areas with limited connectivity and automated client project related billing

The RDT solution has been developed and enhanced over the last five years around real client experiences gained by working with global organizations. HCL AXON has been able to accelerate project lifecycles with one client achieving its first “go-live” implementation in 90 days. The solution has been selected by a variety of oilfield service companies and other organizations, including those involved in well services, off-shore marine services and pipelines.

Upon hearing of the certification, Joe Campbell, head of HCL AXON's Oil and Gas practice in EMEA stated: "The RDT is mature, comprehensive and enables both national and global oilfield services clients to rapidly deploy the benefits of SAP solutions at lower costs.

"With the RDT, we hit the ground running," added Campbell. "Within a very short period of time, our consultants have a design that leverages the RDT assets, our global oil and gas experience and our client's specific requirements. With the current market volatility, we are seeing increasing interest from oilfield services organizations. These organizations wish to implement best practice controls and processes in the quickest possible timeframe, as margins tighten and the market is becoming more competitive."

Today's announcement was made at SAPPHIRE® 2009, being held here May 11-14, where HCL AXON is exhibiting in booth 945.

###
