

HCL AXON Certified in SAP® Value Management

HCL AXON Accelerates Value and Benefit Realization for Customers Using SAP Solutions

Jersey City, NJ. – May 14, 2010 - HCL AXON, a division of HCL Technologies and a provider of business transformation consulting services through the innovative implementation and support of SAP applications, announces the development of iCTRL, a comprehensive Web Enablement and Smart Meter Application to support the emerging Advanced Metering Infrastructure (AMI) markets for North America and abroad. iCTRL is a integrated offering for Utilities who want to empower their customers with AMI data to drive energy efficiency.

HCL AXON is focused on “Smart Energy.” Markets around the globe are developing new tools for mandates and tariffs local governments are requiring from their energy providers. This includes Smart Grids, Smart Meters and other new products that focus on energy distribution. iCTRL was conceived with the goal of adding the most important piece to Smart Energy – “The Smart Consumer.” iCTRL creates a true customer experience. It goes where the customer goes: on the web, on their smart phone, on their in-home device display, and of course, on their iPhone or iPad. iCTRL brings the information to the customer in a way that fits any lifestyle.

HCL AXON wanted to create a solution with the customer experience in mind. iCTRL enables the customer to have information real-time, all the time including product/tariff re-pricing and period-to-date costing that shows the customer the dollars and cents of their energy usage throughout the day/night. Features of iCTRL include real-time voltage checks, current consumption, and access to in-home devices and smart applications. HCL AXON and iCTRL give the customer the power to affect their usage and ultimately save money.

“As a comprehensive customer interaction portal, iCTRL will truly put the customer in control of their account and energy usage,” commented Richard Minney, Head of Products for HCL AXON. “Our recent participation in the SAP lighthouse council has fully validated the need for iCTRL. The Lighthouse Council is made up of key customers and partners who demand that new market requirements are being address by SAP or their Partner Ecosystem.”

To learn more about iCTRL, please visit our booth #3001 at 2010 SAPPHIRE NOW, May 17-19th in Orlando, Florida.

Forward-looking Statements

Certain statements in this release are forward-looking statements, which involve a number of risks, uncertainties, assumptions and other factors that could cause actual results to differ materially from those in such forward-looking statements. All statements, other than statements of historical fact are statements that could be deemed forward looking statements, including but not limited to the statements containing the words 'planned', 'expects', 'believes', 'strategy', 'opportunity', 'anticipates', 'hopes' or other similar words. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding impact of pending regulatory proceedings, fluctuations in earnings, our ability to manage growth, intense competition in IT services, Business Process Outsourcing and consulting services including those factors which may affect our cost advantage, wage increases in India, customer acceptances of our services, products and fee structures, our ability to attract and retain highly skilled professionals, our ability to integrate acquired assets in a cost effective and timely manner, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, the success of our brand development efforts, liability for damages on our service contracts, the success of the companies / entities in which we have made strategic investments, withdrawal of governmental fiscal incentives, political instability, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property, other risks, uncertainties and general economic conditions affecting our industry. There can be no assurance that the forward looking statements made herein will prove to be accurate, and issuance of such forward looking statements should not be regarded as a representation by the Company, or any other person, that the objective and plans of the Company will be achieved. All forward looking statements made herein are based on information presently available to the management of the Company and the Company does not undertake

to update any forward-looking statement that may be made from time to time by or on behalf of the Company.

SAP Forward Looking Statements

SAP Forward-looking Statement Any statements contained in this document that are not historical facts are forward-looking statements as defined in the U.S. Private Securities Litigation Reform Act of 1995. Words such as "anticipate," "believe," "estimate," "expect," "forecast," "intend," "may," "plan," "project," "predict," "should" and "will" and similar expressions as they relate to SAP are intended to identify such forward-looking statements. SAP undertakes no obligation to publicly update or revise any forward-looking statements. All forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. The factors that could affect SAP's future financial results are discussed more fully in SAP's filings with the U.S. Securities and Exchange Commission ("SEC"), including SAP's most recent Annual Report on Form 20-F filed with the SEC. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates.
